UKRISS Crosswalk

UKRISS Crosswalk Connector

User Documentation

Abstract

Welcome to the home site of the UKRISS Crosswalk Connector. This document describes how to install, implement and configure the tool for the Crosswalk project.

The Crosswalk Connector is a demonstration tool to show how support can be given for extracting research data from a university's databases and exporting it to XML conformant with the CERIF standard. The tool is a general purpose data integration tool with specialised steps for handling CERIF.

The Crosswalk Connector is available as a download from this site. It is open-source, and is freely available to the public under GPL3.
